

YAMAHA MUSIC WONDERLAND

for 3 year olds

objective : discover and play with the building blocks of music

Music Wonderland is designed for children to discover and play with the elements of music, so that it becomes a natural mode of expression. That's why there are specific subjects, each with a specific goal.

Through the **SONGS WITH WORDS** children experience the most natural melodic instrument: the voice. Thus they learn to speak and sing.

Through **GUIDED LISTENINGS** children learn to listen to music, to imagine it, to live it with movement, discovering the families of instruments and gradually understanding the basic rules and structures.

Through the **LISTENING GAMES** children learn the characteristics of language: loud and flat sound, high and low, tied and staccato, slow and fast.

Through the **RHYTHM GAMES** children live with movement, "in time", the musical metrics and learn the rhythmic sense and duration of sounds in the most natural and effective way.

Through the **KEYBOARD GAMES** children begin to play, first of all to become aware of the arms, hands, fingers, right and left side of the body, then to know the geography of the keyboard (and the sounds), and then have fun with match the sound of the different instruments to the most correct musical context.

The course is annual, with 30 collective lessons per year (15 per semester), of 45 minutes each, once a week, together with dad or mom. Request the course calendar from the contacts listed below.
